

## New Requirements for Publishing Material Funded by NIH Grants

Effective 7 April 2008, the U.S. National Institute of Health (NIH) will require that all peer-reviewed articles, wholly or partially deriving from NIH funds, must be submitted to PubMedCentral (PMC) upon acceptance for publication (National Institute of Health, "Revised policy on enhancing public access to archived publications resulting from NIH-funded research" [NIH Guide Notice NOT-OD-08-033](#)).

Authors must ensure that the copyright transfer agreements that they sign with a journal publisher must allow them to make the manuscript held in the PMC archive freely available within 12 months of publication of the article.

### How to comply with *International Psychogeriatrics* and Cambridge University Press:

- ✓ *International Psychogeriatrics* standard transfer of copyright agreement allows authors to place a copy of their accepted **manuscript** in a variety of places, including PMC (see further details at <http://journals.cambridge.org/copyright>).
- ✓ *International Psychogeriatrics* allows the PMC archive record to be made freely available under embargo of 12 months, post-publication (see further details at <http://journals.cambridge.org/copyright>).
- ✓ If you are funded by NIH, The Wellcome Trust, UKRC, HHMI and many other agencies, Cambridge Journals' are fully compliant with the respective requirements of these organizations (see further details at <http://www.sherpa.ac.uk/romeo.php>).
- ✓ Cambridge is listed as a 'Green' publisher in the SHERPA/RoMEO database of publishers' copyright and self-archiving policies (see further details at <http://www.sherpa.ac.uk/romeo.php>).
- ✓ A growing number of Cambridge Journals offer authors the ability to publish their articles under an Open Access model (see further details of the Cambridge Open Option at <http://journals.cambridge.org/openoption>).

For a more detailed explanation of Cambridge University Press' policies on Open Access Archiving, go to <http://journals.cambridge.org/OAarchiving>.
