2024 IPA INTERNATIONAL CONGRESS
SEPTEMBER 25-27, 2024

Buenos Aires ARGENTINA

About IPA

International Psychogeriatric Association
Better Mental Health for Older People

Since 1982, the International Psychogeriatric Association (IPA) has been dedicated to improving the mental health of older people around the world by supporting mental healthcare professionals through programs, resources and services in education, research, professional development, advocacy, and health and service promotion. With members from more than 50 countries, the IPA global community encompasses all issues related to the mental health of older people (incl. healthy aging and age-related diseases) and all disciplines – psychiatrists, neurologists, geriatricians, scientists, epidemiologists, psychologists, nurses, occupational therapists, social workers and others working in this field.

Recently, IPA adopted a bold and ambitious strategic plan which will include more meetings each year as a means to impact and enhance more sharing of knowledge, research and effective care practices. We invite and ask you to support this effort as a strategy to address the exponential worldwide growth of the aged population. By working together, IPA with our sponsors – corporate, governments, foundations and individuals – we can make a difference in the care of our own family members and in our global family.

IPA Member Benefits

- Subscription to *International Psychogeriatrics*, IPA's multidisciplinary peer-reviewed journal published monthly
- Subscription to the *IPA Bulletin*, IPA's membership newsletter
- Reduced rates and access to IPA congress and meetings
- IPA Online – the IPA website – including the IPA Member Area with special features including access to fellow members and *The IPA Complete Guide to Behavioral and Psychological Symptoms of Dementia (BPSD)*
- Participation in IPA Member Forums, IPA's in-person and online groups which enable members to meet, communicate, and collaborate with IPA colleagues around the world.

IPA Board of Directors

OFFICERS

Anne Margriet Pot President *The Netherlands*
Adriana Hermida President-elect *United States*
Diego De Leo Secretary *Italy*
Edgardo Reich Treasurer *Argentina*
Manabu Ikeda Immediate Past President *Japan*

DIRECTORS

Terence Chong *Australia*
Raymond Koopmans *The Netherlands*
Tomas Leon *Chile*
Rob Madan *Canada*
Deborah Oliveira *Chile*
Kiran Rabheru *Canada*
Hilde Verbeek *The Netherlands*

About the Congress

In the past decade, the field of geriatric mental health has benefited from advances including the promise of a cure of major diseases impacting our patients and their families. Improved understanding of the biology of Alzheimer's and other dementia causing diseases, late life depression, sleep disorders, anxiety disorders, delirium and others, provides an optimistic view that, at least in some cases, "cures" might be forthcoming in the professional lifetimes of younger IPA members. At the same time, there will be an increase in the numbers of older people who will require mental health care in the decades to come. Hence, balancing races for the cure against the undeniable obligation we have as mental health professionals to care for our patients and their families is more prescient today than in the past. In fact, increasingly care and cure are blended in our professional lives such that the most effective interventions of today combine cure and care-oriented approaches.

This year's IPA Congress places the balance between care and cure at the center of our professional deliberations. We will be selecting an interdisciplinary program of keynote, plenaries, symposia, free communication and poster sessions on topics that encompass the broad spectrum of Psychogeriatrics ranging from understanding exciting basic research methods such as optogenetics, to focus on resilience and prevention, to blended interventions for example, targeting the management of neuropsychiatric symptoms seen in people living with dementia. These are just a few of the interesting and thought-provoking subjects that will be explored and discussed at the 2024 Joint International Congress.

IPA Affiliate Organizations

IPA Affiliate Organizations are related multinational, national, regional and local organizations that share the common mission of advancing clinical practice, research, and education to improve the mental health of the elderly. IPA values the increased impact that a coalition of related organizations can achieve. Together we can realize meaningful and measurable improvements in the mental health and well-being of our elderly around the world.

Welcome Message

Dear Colleagues:

As co-chairs of the IPA Congress Organizing Committee, we would like to warmly welcome you to the 2024 IPA Congress. We are thrilled that IPA chose Buenos Aires for the 2024 International IPA meeting! This is the first time that a South American city has been designated for the Congress venue, and consequently, our Congress theme is *Crossing Oceans and Connecting People to Improve Mental Health for Older Adults*.

This will be a Forum to interact with international colleagues, to develop new projects and liaisons, and also to discuss new approaches to foster our objective to promote better mental health for older people.

Buenos Aires is a vibrant and beautiful city, full of social, cultural and artistic resources and alternatives to explore and discover.

We look forward to welcoming you in an environment of a very attractive and multidisciplinary program, inside a friendly and amazing city, and sharing an unforgettable event with you. See you in Buenos Aires!

Kinds Regards,

Laura Garau, Co-Chair

Congress Committees

Dear Colleagues,

It gives us great pleasure to join IPA President, Anne Margriet Pot, in welcoming you to the 2024 IPA International Congress in Buenos Aires, Argentina.

This year's IPA Congress focuses on the main theme of Crossing Oceans and Connecting People to Improve Mental Health for Older Adults. We have selected a keynote, plenaries, symposia, free communication and poster sessions on topics that encompass the broad spectrum of Psychogeriatrics. In this program, you will find many exciting topics of discussion that will be at the 2024 International Congress.

We hope that you will take this opportunity to expand your knowledge and broaden your professional networks during daily sessions and local programs. You will learn something new and experience the diversity of topics and backgrounds that makes the IPA community so unique. We look forward to seeing you at the many educational symposia, poster sessions, workshops and site visits to local care facilities.

On behalf of the members of the Organizing Committee, Scientific Committee and Local Organizing Committee, we wish you a pleasurable and informative Congress. Thank you for joining us!

2024 IPA AWARDS

2024 IPA Junior Research Awards in Psychogeriatrics

Presented in conjunction with IPA Congresses, the IPA Junior Research Awards in Psychogeriatrics are an example of IPA's commitment to presenting groundbreaking work to its members and developing new leaders. These prestigious awards were created to encourage and reward junior researchers and recognize the best, original, unpublished research in the field of Psychogeriatrics.

We applaud all of those who submitted their work, and we encourage everyone to attend the Junior Research Award winner's session taking place on Thursday, 26 September 2024 at 12:00pm.

Travel Stipend Award

Winner

Jorge Jesus L. Llibre-Guerra, United States

Cognitive impairment and Dementia in Latin American Individuals with Parkinsonism and Parkinson's Disease: A 10/66 Dementia Research Group Study

Free/Oral Presentation Awards

Winner

Jissa Martin

Sex differences in population attributable fractions of modifiable dementia risk factors: evidence from Rush University Memory and Aging Project.

Winner

Wendal Lima Rabelo

Assessing physical activity's impact on dementia occurrence among older adults in Brazil: Evidence from the ELSI-Brazil Study

Poster Presentation Awards

Winner

Alexandre Monteiro

Why Doesn't Grandma Remember Me? Exploring the World of the Brain and Memory through Educational Activities and Cognitive Stimulation

Winner

Livio Rodrigues Leal

Comparison between three cognitive impairment screening tools (MMSE, MoCA and MoCA basic) for seniors with low education in primary care in Brazil

Winner

Ryo Shikimoto

Neuropsychological and brain profiles in elderly adult cancer survivors: A population-based cross-sectional study

We want to express our sincere appreciation to the Junior Research Award selection committee for their conscientious work:

Liat Ayalon, Co-Chair (Israel)

Tomás León, Co-Chair (Chile)

Ricardo Allegri (Argentina)

Luis Ignacio Brusco (Argentina)

Manabu Ikeda (Japan)

Maria Lapid (USA)

Facundo Manes (Argentina)

Erlene Rosowsky (USA)

2024 Distinguished Service Awards

IPA recognizes those who have provided extraordinary service in each of these categories: Service to the country hosting the Congress, service to the field of Psychogeriatrics, and service to IPA. Recipients have demonstrated inspiration, leadership, vision, ethics, innovation, organizational development and motivation in areas of Psychogeriatrics which include service delivery, advocacy/public policy, training, multidisciplinary care, community care, research, scholarly activities, writing, etc. Past recipients have included noted leaders in the field, founders of leading organizations, a knight and a queen. Selection is by the IPA Board of Directors

Please join us in congratulating this year's recipients who have contributed in such noteworthy fashion to the IPA's mission...*Better mental health for older people*

Service to the Field of Psychogeriatrics

Kiran Rabheru, Canada

Service to Congress Host Country (Argentina)

Alicia Kabanchik, Argentina

Service to the International Psychogeriatric Association (IPA)

Tzung-Jeng Hwang, Taiwan

Congratulations to all of the 2024 Award winners!

GENERAL INFORMATION

About Buenos Aires, Argentina

Buenos Aires is Argentina's big, cosmopolitan capital city. Its center is the Plaza de Mayo, lined with stately 19th-century buildings including Casa Rosada, the iconic, balconied presidential palace. Other major attractions include Teatro Colón, a grand 1908 opera house with nearly 2,500 seats, and the modern MALBA museum, displaying Latin American art.

For more information, visit the Tourism Office official web:

<https://turismo.buenosaires.gob.ar/en>

Registration Desk

The registration desk is located just up to stairs at the entrance of the main foyer and will be open during the following dates and times:

25 September 8:30am – 5:30pm
26 September 8:30am – 5:30pm
27 September 8:30am – 5:30pm

Exhibition Hall and Poster Hall

The poster hall is located in the Foyer Gran Panamericano and will be open during the following dates and times:

25 September 12:00pm – 6:00pm
26 September 9:00am – 6:00pm
27 September 9:00am – 6:00pm

* Poster presentations take place on Thursday and Friday from 11:45am – 12:30pm. See the poster list for additional information on posters.

Venue

[Buenos Aires Marriott](#)
Carlos Pellegrini 551, C1009 CABA
Argentina • +54 11 4348-5000

Opening Session/Welcome Reception

The Opening Session will be held at Buenos Aires Marriott Panamericano North Room from 5:00pm to 6:30pm, followed by a Welcome Reception in the Los Jardines Room.

Long Term Care Visits

A very popular feature of IPA meetings is the opportunity to visit and learn from local colleagues at a care facility. The Organizing Committee has scheduled two off-site visits to two local facilities.

Please, contact the Registration Desk at the to book your place.

*Visits will take place on **Friday, 27 September at 4:15pm. Meeting point:** main door of the Marriott Hotel

Dress Code

Business casual attire is requested for all scientific sessions and functions, unless otherwise stated.

Badges

Delegates and guests are requested to wear their name badges at all times during the Congress and social events, for security reasons.

Certificate of Attendance

If you require a certificate of attendance, please email info@ipa-online.org and they will email you one after the Congress.

CME Accreditation

Joint Accreditation Statement

Physicians

In support of improving patient care, this activity has been planned and implemented by Amedco LLC and International Psychogeriatric Association. Amedco LLC is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Professions in scope for this activity are listed below. Amedco Joint Accreditation Provider Number: 4008163

Amedco LLC designates this live activity for a maximum of 12.5 AMA PRA Category 1

CreditsTM for physicians. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses

Amedco LLC designates this activity for a maximum of 12.5 ANCC contact hours.

Psychologists

This course is co-sponsored by Amedco and International Psychogeriatric Association. Amedco is approved by the American Psychological Association to sponsor continuing education for psychologists. Amedco maintains responsibility for this program and content. Maximum of 12.5 hours.

The following state boards accept courses from APA providers for Counselors: AK, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, MD, ME, MO, NC, ND, NH, NE, NJ, NM, NV, OK*, OR, PA, RI, SC, SD, TN, TX, UT, VA,

WI, WY

MI: No CE requirements.

***OK:** Accepts APA credit for live, in-person activities but not for ethics and/or online courses.

The following state boards accept courses from APA providers for MFTs: AK, AR, AZ, CA, CO, CT, DE, FL, GA, IA, ID, IN, KS, MD, ME, MO, NE, NC, NH, NJ, NM, NV, OK*, OR, PA, RI, SC, SD, TN, TX, UT, VA, WA, WDC, WI, WY

AL MFTs: Credits authorized by NBCC or any other state licensing agency will be accepted.

MA MFTs: Participants can self-submit courses not approved by the MAMFT board for review.

The following state boards accept courses from APA providers for Addictions Professionals: AK, AR, CO, CT, DC, DE, GA, IA, IN, KS, LA, MD, MO, MT, NC, ND, NE, NJ, NM, NY (held outside NY ONLY), OK*, OR, SC, UT, WA, WI, WY

The following state boards accept courses from

APA providers for Social Workers: AK, AR, AZ, CA, CO, DE, FL, GA, ID, IN, KY, ME, MN, MO, NE, NH, NM, OR, PA, VT, WI, WY

Wi-Fi Internet

Wireless internet service is available throughout the Buenos Aires Marriott and is free of charge.

Simultaneous Translation

Translation service will be available in Gran Panamericano North from Thursday 26 September through Friday 27 September. If you please to use these services, please note that this will be provided using your personal cell devices. **Please plan to bring your cell phone and headphones for these sessions.**

Meeting Room Protocol

Every effort will be made to ensure that sessions start and end on time. Presenters and congress delegates are all asked to work together to achieve this. This may mean having to quickly end a valuable discussion. However, the Congress organizers request cooperation for the benefit of all delegates and hope you will take the opportunity to continue discussions after session outside of the room.

You are not permitted to make sound or video recordings or take photographs during sessions. We request that all mobile phones and/or pagers be turned off or set to silence before entering sessions.

Liability and Insurance

Please do not leave bags, suitcases or any personal belongings unattended at any time, whether inside or outside the session halls.

For more information, please visit: <http://www.ipa-online.org>

SCIENTIFIC PROGRAM

Wednesday, 25 September

9:00pm to 4:30pm Board of Directors Meeting

Opening Session

5:00pm – 6:30pm Keynote Address
The Complex Nature of Mental Health Issues in Older Age

Alexander Kalache

Global Dementia Strategy: Current Stage and Challenges

Liliana Urbina

Overview: Dementia is a critical global health issue affecting more than 55 million people, and this number is projected to rise to nearly 80 million by the end of the decade. It is the seventh leading cause of death, disproportionately affecting women, with most cases occurring in low- and middle- income countries (LMICs). The economic burden of dementia is immense, with annual costs estimated at \$1.3 trillion in 2019, expected to more than double by 2030. Half of these costs are due to informal care, primarily provided by women, who face significant impacts on their physical and mental health. Despite its severity, dementia receives insufficient attention. In May 2017, recognizing dementia as a public health priority, the World Health Assembly approved the Global Action Plan on the Public Health Response to Dementia 2017-2025, which serves as a comprehensive blueprint for policymakers, international, regional, and national partners, and the WHO. The plan addresses the issue through seven strategic areas: policy; awareness; risk reduction; diagnosis, treatment, care and support; strengthening health information systems, and

research. However, significant gaps remain in diagnostics, national dementia plans, and research. To facilitate the monitoring of the global action plan, WHO has created the Global Dementia Observatory (GDO), a portal that collects national data on 35 key indicators across the seven strategic areas of the global action plan. Complementing the Observatory, WHO launched a Knowledge Exchange Platform, a repository of best practice examples aimed at fostering mutual learning and multidirectional exchange among regions, countries, and individuals, to facilitate global action. The GDO serves as a monitoring and accountability tool, guiding countries in policy implementation and progress tracking. To meet the 2025 targets, accelerated efforts are needed, emphasizing national responses, equitable access to services, and inclusion of people with dementia. Renewed political commitment and robust health information systems are essential to guide effective planning and action.

7:00pm – 9:00pm Welcome Reception

Location: *Los Jardines Room – Buenos Aires Marriott*

SCIENTIFIC PROGRAM

Thursday, 26 September

8:00am - 8:45am Free/Oral Communication Presentations

Sessions 1 - 6

9:00am – 10:00am Plenary Session 1 - Mental health needs of older people in LMIC in a connected world: A Latin America perspective

Cleusa Ferri

Overview: The mental health of older people in Latin America has become increasingly significant due to population ageing and changes in social structures across the region. Older adults in the region, as in many parts of the world, face significant challenges that can impact their mental health, including poverty, social isolation, limited access to healthcare, and the stigma associated with both mental health issues and ageing. Access to mental healthcare services in the region is particularly limited for older adults, with a shortage of geriatric specialists and mental health professionals trained to address their specific needs. Changes in family structures, and the lack of support received by informal caregivers, can influence the availability and quality of informal support and caregiving networks, affecting both older people and caregivers' mental health. While the mental health of older people in Latin America is a subject that is gaining attention, significant gaps persist in terms of healthcare access, social support, and effective policy implementation. We will explore some of the key factors influencing the mental health of older adults in the region, alongside the current efforts and challenges in developing innovative policies and programs aimed at promoting their mental health and well-being.

10:00am-10:15am Coffee and Posters

10:15am-11:45am Symposia

Session 7

Crossing Oceans and Connecting People to Promote the Human Rights of Older People

Carmelle Peisah, Liat Ayalon, Anne Wand, Kiran Rabheru, Andrew Byrnes, Carlos Augusto de Mendonca Lima

Overview: The International Psychogeriatric Association (IPA) has been steadfast in its commitment towards advancing human rights of older persons since the release of its 2011 White Paper which expanded the focus of the Capacity Task Force to prioritize human rights. Through partnerships with the World Psychiatric Association Section Old Age Psychiatry (WPA-SOAP), Capacity Australia, International Longevity Centre Canada (ILC Canada), Canadian Coalition Against Ageism (CCAA), and Rights of Older Persons Australia (ROPA), IPA members have emerged as global leaders in advocating for integration of human rights-based mental health care for older persons. Advocacy efforts have spanned grassroots and global strategies. At the grassroots level, IPA has championed the seamless integration of human rights principles into clinical practice, demonstrating a commitment to action. Globally, IPA has engaged in advocacy for a United Nations (UN) convention on the rights of older persons, notably through active participation in UN Open Ended Working Group on Aging (OEWGA).

Presentations

- **Walking the Talk: 20 Ways to Embed Human Rights in Everyday Clinical Practice-** *Carmelle Peisah*
- **Is a new treaty on the human rights of older persons critical for effective policy making? A lawyer's perspective-** *Andrew Byrnes*
- **Actualising human rights of older persons with severe mental illness -** *Anne Wand*
- **The UN Decade's and our own efforts to address ageism-** *Liat Ayalon*
- **Our role and impact with the Open-Ended Working Group on Aging (OEWGA), the Office of the High Commissioner for Human Rights (OHCHR), and the World Health Organization (WHO)-** *Kiran Rabheru*
- **The Global Alliance for Rights Based Care and Support (GARBCS)-** *Carlos Augusto de Mendonça Lima, Gabriel Ivbijaro, Helen Lavretsky, Kiran Rabheru*

Session 8

Neuromodulation in Geriatric Psychiatry: Innovations and Insights in ECT, TMS, tDCS, and Cannabinoid Therapies

Maria I. Lapid, Georgios Petrides, Adriana P. Hermida, Brent P. Forester

Overview: With the rapidly aging population worldwide, the psychiatric care of older adults faces increasingly complex challenges. Geriatric psychiatry must adapt to address the rising prevalence of depression, anxiety, and cognitive impairments with innovative and effective treatments. Neuromodulation in geriatrics encompasses variety of innovative treatments designed to help manage symptoms of various neurological and psychiatric conditions common in older adults. This symposium will explore the mechanisms, clinical applications, safety, and up-to-date research in Electroconvulsive Therapy (ECT), Transcranial Magnetic Stimulation (TMS), Transcranial Direct Current Stimulation (tDCS), and cannabinoid therapies in older adults.

Presentations

- **Updated research on the effectiveness of ECT to treat agitation in patients with dementia-** *Georgios Petrides*
- **Review of the TMS literature and share clinical outcomes from Emory University -** *Adriana Hermida*
- **Discuss tDCS effectiveness in depression among older adults-** *Maria Lapid*
- **Examine cannabinoids' role in dementia-related agitation, including ongoing clinical trials with dronabinol-** *Brent Forester*

Session 9

Geriatric mental health care and training in India – A critical review of progress and future directions

Sivakumar Palanimuthu Thangaraju, Krishna Prasad Muliya, Thirumorthy A

Overview: This symposium will present a critical review of the progress in geriatric mental health care services across India by summarizing the initiatives to promote geriatric mental health care and training. The need for comprehensive psychosocial care and psychiatric rehabilitation along with the acute geriatric mental health care will be addressed by experts involved in geriatric mental health care and training.

Presentations

- **Geriatric mental health care in India- scope, challenges and innovative initiatives-** *Sivakumar Palanimuthu Thangaraju*
- **A review of the initiatives for the training to promote the workforce for geriatric mental health care in India-** *Krishna Prasad Muliya*
- **Psychosocial interventions for geriatric mental health care- Scope and challenges-** *Thirumorthy A*

Session 10

The LatAm-FINGERS Initiative: The First Non-Pharmacological Randomized Controlled Trial to Prevent Cognitive Decline Across Latin America

Gustavo E. Sevelev, Lucia Crevelli, Rosa Maria Salinas, Ana Charamelo, Carolina Delgado

Overview: In this session, we will provide an overview of the trial's objectives and outcomes, the basis for the multidomain interventions, and describe the recruitment and adherence strategies implemented. We will conclude with results regarding the association of cardiovascular risk factors with social determinants of health.

Presentations

- **LatAm-FINGERS: Establishing Eligibility and Outcomes for Effective Research Across Latin America-** *Lucía Crivelli*
- **Design and Harmonization of Interventions, barriers, and challenges-** *Ana Charamelo*
- **Recruitment Strategies in the LatAm FINGERS Trial: a multicultural effort to prevent dementia across Latin America-** *Rosa Maria Salinas*
- **Cardiovascular health is associated with social determinants of health in the LatAm-FINGERS cohort** *Carolina Delgado*

Session 11

Social Well-Being Through the Continuum of Dementia: Addressing BPSD and Communication Handicap Through Innovative Interventions Supporting Person-Centered Care

Ana Ines Ansaldo, Maria Sol Rossi, Yves Joannette

Overview: The 2017-2025 WHO Global Action Plan on the response to dementia emphasizes the necessity of developing approaches to sustain physical, mental, and social wellbeing in people with dementia, their caregivers, and families. Since the publication of this Global Action Plan, there has been some progress, particularly regarding physical and mental well-being, while less progress has been made on social well-being, a well-being dimension whose importance was particularly highlighted during the COVID-19 pandemic. In human beings' social connection is established through communication. Hence, communication disabilities in the context of dementia negatively impact social well-being. This Symposium is constructed around three complementary approaches to enhancing social well-being in persons living with dementia.

Presentations

- **Social wellbeing as a central piece for the WHO Global Action Plan as well as for sustaining well-being in healthy aging-** *Yves Joannette*
- **Multi-disciplinary and Socio-health Approach to Dementia Care and Social Well-being: Experiences that Improve Management-** *Maria Sol Rossi*

- **Human Expertise and Artificial Intelligence: Empirical and Clinical Evidence on the Role of Emotional Communication in Social Well-Being of Persons Living with Dementia-** *Ana Inés Ansaldo*

11:45am - 1:15pm Lunch and Poster Presentation 1

12:00pm - 1:00pm **Presentation - IPG Journal Discussion led by Editor-In-Chief Dilip Jeste**

12:00pm - 1:00pm **Junior Research Award Presentation - Cognitive impairment and Dementia in Latin American Individuals with Parkinsonism and Parkinson's Disease: A 10/66 Dementia Research Group Study**

Jorge Jesus L. Llibre-Guerra

Overview: Limited knowledge exists about the association between Parkinsonism or Parkinson's disease (PD) and cognitive impairment and dementia in Latin America. The study aimed to determine the cross-sectional and prospective associations between Parkinsonism and PD with cognitive impairment and dementia in a large multi-country cohort in Latin America.

1:15pm - 2:45pm Symposia

Session 12 **Cross cultural perspectives on Holistic approach to promote healthy ageing- Insights from India and Brazil**

Sivakumar Palanimuthu Thangaraju, Shivarama Varambally, Bernardo Viana

Overview: This symposium will summarize the holistic approach to healthy ageing in the global context with specific focus on the perspectives from India and Brazil. Mental health experts from India and Brazil with expertise in Geriatric Psychiatry and Integrative Medicine will be the presenters for the symposium.

Presentations

- **Holistic approach to Healthy ageing: Global Perspectives-** *Sivakumar Palanimuthu Thangaraju*
- **Lifestyle interventions through Integrative medicine to promote Healthy Ageing: Indian Perspective-** *Shivarama Varambally*
- **Scope for Traditional medicine and Holistic approach to Promoting Healthy Ageing in Brazil-** *Bernardo Viana*

Session 13 **Understanding Dementia, Neurodegenerative Disorders, and neuropsychiatric symptoms in Aging populations from Latin America**

Jorge Jesus L. Llibre-Guerra, Daisy Miguelina Acosta, Juan Jesus Llibre-Rodriguez, Ana Luisa Sosa-Ortiz, Isaac Acosta, Ivonne Z. Jimenez-Velazquez

Overview: Dementia presents a growing public health challenge globally and its impact is significantly pronounced in low and middle-income countries (LMICs), including those in Latin America. This symposium aims to present recent findings on the prevalence, impact, and underlying factors of cognitive impairment and neuropsychiatric symptoms in aging populations across Latin America, with a focus on culturally and regionally specific research findings.

Presentations

- **Trends in the prevalence of dementia in Latin America and the Caribbean: findings from the 10/66 studies-** *Juan J Llibre Rodriguez*
- **Cognitive Impairment and Dementia in Latin American Individuals with Parkinsonism and Parkinson's Disease: A 10/66 Dementia Research Group Study-** *Ana Luisa Sosa*

- **Prevalence and impact of neuropsychiatric symptoms in normal aging and neurodegenerative syndromes: A population-based study from 6 Latin America centers-** *Isaac Acosta*
- **Dementia in Latin America – Social determinants of health and genetic ancestry-** *Jorge J Libre Guerra*

Session 14

Addictions in Later Life an Emerging Crisis

Mysore S. RENUKA PRASAD, Carlos Augusto de Mendonca Lima, David Chong

Overview: Substance use disorders (SUDs) among older adults represent a growing but often overlooked public health crisis. This presentation explores the prevalence, impact, and management of SUDs in later life, focusing on alcohol, cannabis, and opiate use, as well as misuse of over the counter (OTC) medications.

Presentations

- **Addictions in Later Life an Emerging Crisis-** *David Chong*
- **The Clinical descriptions and diagnostic requirements for ICD-11 mental, behavioural and neurodevelopmental disorders (CDDR) and Non-Substance Uses Addictions in Old Age (NSUAOA)-** *Carlos Augusto de Mendonça Lima*
- **Non-Substance Addictions in Later Life in Emerging Crisis-** *M.S. Renuka Prasad*

Session 15

Ageism in intersection: Ensuring the human rights of older persons in the face of oppressions

Liat Ayalon, Kiran Rabheru, Silvia Perel-Levin, Lia Daichman, Alexandre Kalache

Overview: This presentation will address ageism in relation to older persons because of its well-known detrimental effects. An important aspect of ageism concerns the fact that it does not occur in silo. Instead, it is often age in intersection with other forms of discrimination, which results in the marginalization of older persons.

Presentations

- **Ageism and age-based discrimination intersect with other forms of biases, discrimination, and inequalities based, such as disability, gender, gender identity and sexual orientation, ethnic background, and socioeconomic status-** *Silvia Perel-Levin*
- **Age in intersection with gender by stressing the vulnerable place of older women and relate this to elder abuse-** *Lia Daichman*
- **Self-directed ageism and intergenerational conflict as they manifest in older persons' political activism-** *Liat Ayalon*
- **Ageism in Canada based on data obtained from a diverse array of stakeholders, including researchers, healthcare professionals, social service providers, older persons, and advocates-** *Kiran Rabheru*
- **Applied tools to ensure the human rights of older persons in the face of institutional, interactional, and intrapersonal ageism-** *Alexandre Kalache*

2:45pm-3:15pm

Coffee and Posters

3:15pm - 4:45pm

Free/Oral Communication Presentations

Sessions 16 - 20

5:00pm-6:00pm

Plenary Session 2 - Elevating Geriatric Mental Healthcare within an Evolving Healthcare Landscape

Brent Forester

Overview: This presentation illuminates the imperative role of geriatric psychiatry amidst an ever-changing healthcare paradigm and the rising prevalence of older adults with

mental health challenges and neurocognitive disorders that drive an escalation in health care spending. Utilizing a holistic approach to assessment and treatment, the field of geriatric psychiatry has the transformative potential to streamline care costs and elevate the quality of mental health services for older adults and individuals with dementia. Exploring diverse healthcare frameworks such as the value-based care model in the US and global payment systems such as those in the Veterans Administration and other socialized medical environments, the lecture advocates for the implementation of integrated geriatric mental health care models. Through an evidence-based analysis of models such as Collaborative Care, Care Ecosystem and Alzheimer's Dementia Care (ADC), the presentation highlights the central role of geriatric mental health care in driving improvements in care quality while reducing overall healthcare expenditures. Drawing from personal insights and professional experiences, the speaker offers a nuanced perspective on the journey towards comprehensive geriatric mental health integration within healthcare system environments. By championing innovation and advocating for integrated care practices, the presentation aims to inspire attendees to embrace a proactive stance in designing and implementing progressive and interdisciplinary geriatric mental health solutions on a global scale.

9:00pm - 11:00pm IPA Dinner
Estilo Campo

SCIENTIFIC PROGRAM - Friday, 27 September

8:00am - 8:45am Free/Oral Communication Presentations
Sessions 21 - 25

9:00am – 10:00am Plenary Session 3 - Improving Mental Health for Persons with Dementia:
Converging Studies' Results and the Roads to Implementation

Jiska Cohen-Mansfield

Overview: Imagine living with dementia. What would your day look like? What would be your living experiences? What is the range of possible experiences? Despite diverse research aims – such as managing agitation, observing dressing habits, reporting on bathing practices, or examining the engaging potential of various stimuli – studies converge on common themes. These themes and study procedures offer guiding principles and practical examples for enhancing the daily lives of individuals with dementia. In this presentation, I will review various such studies that, despite their differing goals, reveal consistent patterns. We will explore the feasibility of implementing these principles and the requirements for successful integration. This analysis suggests the need for a fundamental shift in care premises, indicating that significant improvements in the quality

of life for individuals with dementia can become possible. However, it also underscores the infrastructural limitations that may hinder this progress. Furthermore, it will illustrate how progress necessitates paradigm shifts that fundamentally revise the planning, training, and provision of care. This is an invitation for each of you to step forward, develop, and implement those changes, allowing us to learn from each other's experiences and collectively improve dementia care.

10:00am-10:15am Coffee and Posters

10:15am-11:45am Symposia

Session 26 Older People: Disability vs. Autonomy

Isabel Lovrincevich, Cecilia Volpe, Bibiana Kompel, Wanda Gisbert

Overview: This Symposium seeks to put on the scientific agenda a topic that make us rethink and reevaluate our intervention practices with a comprehensive approach to older people with disabilities.

Presentations

- **Comprehensive approach to frailty as a predictor of disability-** *Wanda Gisbert*
- **Autonomy and dependence in old age-** *Isabel Lovrincevich*
- **A topic that challenges us: New Psycho Gerontological approach-** *Bibiana Kompel*

Session 27

Impulsivity in geriatric, neurological and psychiatric pathologies. Importance of its diagnosis and prevention

María Anahí Brizuela, Gabriela F. Berlowski, Alicia B. Kabanchik, Cecilia M. Serrano

Overview: This presentation aims to highlight the importance of the clinical presentation of Impulsivity in older adults for its early diagnosis and therapy.

Presentations

- **Impulsivity and Medicine in the older adult. Pharmacological treatment and other therapies-** *María Anahí Brizuela*
- **Resolution from the Primary Care in Geriatrics of the patient with mental pathology-** *Gabriela Berkowski*
- **Impulsivity in neurological diseases. Neurobiological basis-** *Cecilia Serrano*
- **Acquired Psychopathy-** *Alicia Kabanchik*

Session 28

Apathy in dementia. Difficult to diagnose, difficult to treat

Santiago O´Neill, Ignacio Flores, Natalia Sierra, Florencia Vallejos, Guido Dorman

Overview: This presentation will focus on the available evidence diagnosis, differential diagnosis, and the best therapeutic tools available, pharmacological and non-pharmacological. Learning and knowing about apathy is essential for correct management.

Session 29

Comprehensive Care for the Elderly: from Stigmatization to Therapeutic Intervention

Florencia Velazquez-Morales, Jose Luis Sierra, Marieli Rivera Ortiz, Yanina Gisela

Overview: This presentation not only provides a comprehensive view of the current situation of the elderly in Puerto Rico but also proposes practical and effective solutions to improve their quality of life and well-being. Attention to this social sector requires effective therapeutic interventions based on evidence, which positively impact the care and

treatment of the elderly, providing crucial support for their well-being and stable mental health. With a focus on continuous improvement, this study seeks to foster a greater understanding and concrete actions that benefit this vulnerable population, ensuring comprehensive and dignified care during their years of greatest need.

Presentations

- **Introducing the Profile of the Elderly in Puerto Rico and Social Stigmatization-** *Florencia Velázquez-Morales*
- **The Role of Grandparents-** *José Luis Sierra*
- **The Ethics of Care and Spirituality in Elderly Care-** *Marieli Rivera Ortiz*
- **Therapeutic Interventions with the Elderly-** *Yanina Gisela Góngora*

Session 30

Mentorship Networking Event

11:45pm-1:00 pm

Lunch and Poster Presentation 2

12:00pm-1:00pm

IPA Business Meeting/IPA Junior Research and Distinguished Service Award Presentation

1:00pm – 2:30pm

Symposia

Session 31

Integrating Human Rights and Mental Health Care and Support for Older Persons

Carlos Augusto de Mendonca Lima, Kiran Rabheru, Liat Ayalon, Silvia Perel-Levin

Overview: Our world is rapidly aging, with medical and public health advancements extending lifespans without necessarily enhancing the quality of those additional years. Individuals in their later years aspire to preserve dignity, maintain autonomy and independence, foster social inclusion, uphold justice and equality, be respected for their identity, and pursue good health, security, purpose and engagement throughout their lives. Unfortunately, ageism is pervasive and has a significant negative impact on the lives of older individuals. Ageism is the root source of severe violations of the human rights of older persons, incontrovertibly uncovered by the COVID-19 pandemic. Ageism not only damages global health and harms the world's economy, but also poses a major barrier for older persons everywhere, especially in preventing them from receiving the human rights-based care and support they deserve.

Session 32

A New Age in Alzheimer's Disease (Presented in Spanish)

Jacobo Mintzer, Edgardo Reich, Diego Aguilar

Overview: Alzheimer's disease is a neurodegenerative disorder affecting over 55 million people worldwide, with 300,000 sufferers residing in Argentina. Over the last 10 years with the emergence of monoclonal antibodies, we have witnessed a radical change in our approach to Alzheimer's disease. Today, we can see the lesion of Alzheimer's disease in the living brain up to 17 years before the onset of symptoms. Furthermore, we have developed blood tests that allow us to identify those at risk to have amyloid in the brain and, in the last two years, a new group of disease-modifying treatments has been approved for clinical use. What remains to be elucidated is how these revolutionary changes will impact patient care and perceptions of Alzheimer's disease in society. Additionally, how these new, often expensive tools to fight Alzheimer's disease will be accessible in developing countries is also unknown. These issues will be discussed during our presentation with a panel of experts in the field.

Presentations

- **Latest advances on biomarkers and new treatments-** *Edgardo Reich*
- **Implications of this new approach for the diagnosis and treatment of Alzheimer's disease around the world-** *Diego Aguilar*

- **Different options that will make these treatments available in developing countries with a focus on Latin America-** *Jacobo Mintzer*

Session 33

The translation of digital technology to promote mental health of older adults

Sally Wai Chi Chan, Rick Yiu Cho Kwan, Fowie Ng, Bobo Hi-Po Lau, Alex CK Chan

Overview: This symposium brings together a group of multidisciplinary researchers in digital mental health. The symposium intends to stimulate global collaboration towards strengthening principles in digital mental health while elucidating additional factors that influence this technology-enabled approach to support older adults in diverse contexts to achieve optimal mental well-being.

Presentations

- **Digital engagement, social support and mental health: Latent profile analysis on the intergenerational digital divide in Hong Kong-** *Bobo Hi-Po Lau*
- **The associations of technology acceptance and social networks with depressive symptoms in community-dwelling older adults-** *Rick Yiu Cho Kwan*
- **The effects of Digital Buddy on the mental well-being and depressive symptoms of older adults: A cluster randomized controlled trial-** *Sally Wai Chi Chan*
- **The effect of therapeutic virtual reality experience on the mental well-being and loneliness of older adults living with physical disabilities in long-term care facilities: Preliminary findings of an ongoing randomized controlled trial-** *Fowie Ng*

Session 34

Artificial intelligence in psychogeriatrics: creating a framework

Ipsit Vahia

Overview: This highly interactive session will present an overview of a range of tools and approaches that utilize artificial intelligence (AI) in the mental health care of older adults and persons with dementia. This includes a review of existing evidence around the use of AI for diagnosis, monitoring and intervention. This session will also serve as a forum for perspectives and feedback from IPA membership around what they believe to be the biggest needs and gaps around the use of AI in the clinical realm. This session will also introduce the new IPA task force for AI in psycho geriatrics.

Session 35

Aging and Dementia problems in Latin America and the Caribbean: education, healthy ageing and recent research linked to microglia and microbiota

Tomas Leon, Alicia B Kabanchik, Cecilia M Serrano, Maria Andrea Carosella

Overview: This presentation will provide a vision of the current situation of ageing and dementia in Latin America and the Caribbean (LAC). The importance of assessing the needs of people with dementia, supporting families, integrating risk reduction strategies, healthy ageing, promoting training programs to support primary care, and promoting new advances in the Microglia axis concept will be highlighted—brain intestine. Despite the enormous burden that dementia generates, it continues to be an underdiagnosed entity. It is essential to control its prevalence, incidence, as well as its different social repercussions. It is crucial to promote direct actions aimed at reducing risk, disseminating knowledge of dementia, and promoting new lines of research that contribute to a healthier life for patients and their families.

Presentations

- **Microglia microbiota aging-** *Alicia Kabanchik*
- **Dementia training needs of primary care professionals-** *Tomás León*
- **Dementia in Latin America and the Caribbean: situation and future challenges-** *Cecilia M Serrano*

- **HEALTHY AGEING: GROUP DEVICE WITH ELDERLY PEOPLE-** *Maria Andrea Carosella*

2:30pm-2:45pm Coffee and Poster take down

3:00pm - 4:00pm **Closing Keynote Address – Advances in Alzheimer's Disease Therapeutics: A Global Perspective**

Jeff Cummings

Overview: Alzheimer's disease (AD) therapeutics are advancing at a rapid rate. After a 17-year hiatus with no new drugs approved worldwide, there have been approvals of disease modifying agents in 2021 and 2023 by the US Food and Drug Administration (FDA) and an additional agent is under review by the FDA. Lecanemab is approved in the US, China, and South Korea and is under 2024 IPA International Congress 5 review by many other countries. Widespread availability of anti-amyloid monoclonal antibodies is likely over the next few years. Appropriate use of these agents requires substantial healthcare infrastructure to ensure patient benefit and safety. Administration of monoclonal antibodies in countries where healthcare systems are less robust is challenging. Advances in the global treatment of Alzheimer's disease require an improved understanding of the neurobiology of Alzheimer's disease; the development of drugs that are accessible, efficacious, and safe; the creation of international clinical trial infrastructure to recruit more representative populations; education strategies to ensure the correct use of new drugs by clinicians; and implementation approaches that are culturally appropriate to inform patients about the availability of treatment and their proper use.

Conduct of clinical trials and development of clinical trial site networks has many advantages including education about AD and clinical trials, learning strategies to rigorously generate robust clinical data, patient education opportunities, revenue generation, recruitment of diverse global populations, and interactions with biotechnology companies with improved collaboration and understanding of industry-based careers. Drug development for Alzheimer's disease addresses a global problem and requires a global solution.

4:15 pm- 6:00pm **Long Term Care Site Visits**

Site 1:

Site 2:

SCIENTIFIC PROGRAM - POSTERS

The poster display is located in the Foyer Gran Panamericano. Posters will be available for viewing throughout the Congress. Poster presenters will be available to present their posters and answer questions during the following time:

| 1 | Coping strategies used by caregivers of patients with Alzheimer's disease | Alexandre Monteiro |
| 2 | Analysis of resilience levels in caregivers of patients with young and late onset Alzheimer's disease | Alexandre Monteiro |
| 3 | Analysis of the different coping styles adopted by caregivers and their relationship with the manifestation and intensity of psychological and behavioral symptoms in patients with young-onset Alzheimer's disease | Alexandre Monteiro |
| 4 | Why Doesn't Grandma Remember Me? Exploring the World of the Brain and Memory through Educational Activities and Cognitive Stimulation | Alexandre Monteiro |
| 5 | Managing patients with dementia and comorbid psychiatric disorders: a literature review and case series | Alvin Keng |
| 6 | Strengthening Dementia Care: Advancing Through ADI Accreditation for Excellence and Acknowledgment | Diego Aguilar |
| 7 | Implementation of Cognitive Stimulation Therapy for People with Dementia in Nursing Homes in Brazil | Amanda Pelinson Tiago |
| 8 | Depression, diabetes, and healthcare services use – Brazilian Longitudinal Study of Aging (ELSI-Brazil, 2015-2016) | Ana Keinert |
| 9 | Computer-based Neuropsychological Rehabilitation in Latin America | Andrea Alvarado Rodas |
| 10 | Possible Lamotrigine-Induced Mania in a patient Epilepsy and perictal psychotic symptoms | Andrea C. Casas |
| 11 | Clozapine-Induced Thrombocytopenia: Whether or Not to Continue Clozapine Treatment when Platelet Count Falls | Arielle Silbersweig |
| 12 | Buddhist temples are promising social resources in secular community-based integrated care (3): The Effects of Buddhist Sutra chanting on swallowing function and mental health. | Ayako Edahiro |
| 13 | Validation of a Catalogue of Videos with a Positive Emotional Impact to Support Communication, Empathy and involvement with the Healthy Elderly People | Barbara Delacourt |
| 14 | How does dorsolateral prefrontal cortex plasticity differ across the Alzheimer's disease spectrum? | Bernadette Mdawar |
| 15 | A narrative review comparing guardianship procedures for people with mental disabilities of countries from six continents | Bernardo De M. Viana |
| 16 | Hippocampus Atrophy due to Treatment Resistant Depression in an Older Adult | Bernardo De M. Viana |
| 17 | Confirmatory Factor Analysis of the Cognitive Domains and Functional Assessment Questionnaire (CDFAQ) | Bernardo De M. Viana |
| 18 | BDNF levels and affective disorders as a marker of vulnerability to developing cognitive impairment in the Chilean adult population | Carolina E. Martin |

| | | |
|----|--|-----------------------------------|
| 19 | Screening for depression among older adults: a cross-sectional study in primary care in Brazil | Carolina Godoy |
| 20 | Evaluating xanomeline and trospium as a treatment for psychosis associated with Alzheimer's disease: design of the phase 3, ADEPT-1, relapse prevention study | Carolyn Watson |
| 21 | Buddhist temples are promising social resource in secular community-based integrated care (2): Peer support, spiritual care, and grief care for caregivers at the Buddhist temples caregiver cafés | Chiaki Ura |
| 22 | Treatment-resistant depression and risks of suicide and natural mortality in Taiwanese elderly patients with major depressive disorder | Chih-Ming Cheng |
| 23 | Characteristics of older adults with domestic squalor in Japan: a cross-sectional study | Daiki Taomoto |
| 24 | Quality of life of family carers of people living with dementia: Review of systematic reviews of observational and intervention studies | Deborah Oliveira |
| 25 | Effects of iSupport for reducing burden and improving the mental health of informal caregivers of people living with dementia in Brazil: Results of a randomized controlled trial | Deborah Oliveira |
| 26 | Variables associated with having psychosocial and healthcare needs among unpaid carers in Chile: Data from the National Disability and Care Dependence Survey (ENDIDE) 2022 | Deborah Oliveira |
| 27 | From Development to Implementation: a Novel Clinical Post-Fall Assessment Tool in Long-Term Care | Diana Cruz Santiago |
| 28 | Promoting Caregiver Wellbeing through Caregiver Literacy | Elaine Jurkowski |
| 29 | Exploring aging trajectories using neurocognitive age | Elise C. Roger |
| 30 | Agitation in Alzheimer's Dementia: Conceptual Framework to Demonstrate the Burden of Illness | Xue Han |
| 31 | Direct and indirect costs of dementia in Brazil | Thais Suarez Guimarães |
| 32 | Association between pain behaviors and sleep impairment among people living with cognitive impairment | Alison R. Anderson |
| 33 | From Depressive disorder with psychotic symptoms to Lewy Body Dementia (LBD)– The Importance of Differential Diagnosis in Psychogeriatrics: A Case Report | Fernanda M. Faria |
| 34 | PHARMACOLOGICAL TREATMENT USE FOR DEMENTIA IN THE ELDERLY POPULATION FROM THE NATIONAL REPORT ON DEMENTIAS IN BRAZIL (ReNaDe): ASSOCIATED ASPECTS | Fernanda M. Faria |
| 35 | Older adult's dementia. Implementation of a multidisciplinary day care program in Argentina. | Gisela E. Guyet |
| 36 | Relationship between Attitudes toward Dementia and Deficiency of Social Functioning among Community-dwelling Older Persons | Hiroki Inagaki |
| 37 | Effect of sleep report feedback with health guidance using a sleep monitoring device for improving sleep in community-dwelling older people: A randomized controlled trial | Hitomi Chikama |
| 38 | The Night's Story. The impact of blindness on the lexical richness of the work of Jorge Luis Borges. | Ignacio Flores |
| 39 | Staying in 1900: a predictor of dementia | Ignacio Flores |
| 40 | In the pocket of the gentleman. Diagnostic of functionality in cognitive impairment within reach. | Ignacio Flores |
| 41 | Loss of Fornix White-Matter Integrity is Associated with Impulse Dyscontrol in Cognitively Normal Older Adults | Juan Francisco Flores-Vazquez |
| 42 | Neuropsychological Impact of Mandatory Preventive Social Isolation (Lockdown) on Older Adults with Cognitive Decline | Julian Bustin |
| 43 | Increase in suicide rates in the elderly population of the state of São Paulo: could Alzheimer's disease be a risk factor? - A Brief Report | Juliano Flavio Rubatino Rodrigues |
| 44 | Suicide behavior in Alzheimer's disease: Searching for new insights. | Juliano Flavio Rubatino Rodrigues |
| 45 | Feasibility evaluation an eHealth intervention to support holistic assessment and decision making for people with dementia in care homes | Clare Ellis Smith |
| 46 | Language + Lexicon: Unique Perspectives on the Stigma Surrounding Alzheimer's Disease from the Latino Community | Mary Chi Michael |
| 47 | Prevalence of suicide among elderly people in Brazil | Keila CT Cruz |
| 48 | Elderly centenarians and the COVID-19 pandemic: integrative literature review. | Keila CT Cruz |

| | | |
|----|--|-------------------------|
| 49 | Sociodemographic and Clinical Insights into Behavioral Variant Frontotemporal Dementia and Early-Onset Alzheimer's Disease in Colombia: A Comprehensive Study of Patients and Caregivers | Lina M. Zapata-Restrepo |
| 50 | Development of Alzheimer's Disease (AD) and Recent Stressful Life Events | Edgardo Reich |

Poster Session 2
Friday, 27 September
11:45am – 12:30pm

| Abstract Number | Poster Title | Presenter |
|------------------------|--|--------------------------|
| 1 | Clinical value of plasma soluble TREM2 in identifying mild cognitive impairment: A community-based study of the Chinese elderly | Lan Wang |
| 2 | Physical-Frailty as impairment of the functional status in older people after a COVID-19 outbreak: Descriptive Study in a Long-Stay Facility in Chile | Lidia Castillo Mariqueo |
| 3 | Functional relationship between muscle strength, gait speed, and cognitive function in elderly people with cognitive impairment: a descriptive cross-sectional observational study | Lidia Castillo Mariqueo |
| 4 | PREMATURE FUNCTIONAL DECLINE IN WOMEN OVER 40 YEARS OF AGE | Lidia Castillo Mariqueo |
| 5 | Functional relationship between locomotion and structural muscle fibers in Alzheimer's Disease, an experimental report from 3xTg-AD mice | Lidia Castillo Mariqueo |
| 6 | Subjective memory correlates with hippocampal subfield volumes in normal cognitive aging | Linda Mah |
| 7 | Comparison between three cognitive impairment screening tools (MMSE, MoCA and MoCA basic) for seniors with low education in primary care in Brazil | Livio Rodrigues Leal |
| 8 | Preventable adverse events and related outcomes among people with dementia in hospital settings: Scoping review. | Lucía Catalán |
| 9 | Changes in sexual activity and sexual satisfaction: views of people with dementia and their spouse-carers | Marcela M. Lima Nogueira |
| 10 | Empowering Caregivers and Older Adults through Educational Initiatives, Cognitive Stimulation Therapy (CST) and Eight Movement Patterns of Brain Dance | Maria E. Bidot |
| 11 | Promoting the Health of Older Adults through the BrainDance at the Multiple Activities Center for the Elderly (CAMPEA) in Santa Mónica, Bayamón (March-May 2023) | Maria J. Rodriguez |
| 12 | From Crisis to Care: Implementing Shared Decision-Making in Psychogeriatric Practice | Marina Guitti De Souza |
| 13 | Chronobiological assessment of stable elderly individuals with type I bipolar disorder | Mateus T. Moura |
| 14 | Impact of perceived sleep quality and sleep aid use on mortality risk: the Brazilian Longitudinal Study of Aging. | Matheus Ghossain Barbosa |
| 15 | The Efficacy of a Novel Multimodal Personalized Physical and Cognitive Training System for Neurocognitive Protection and Enhancement in Older Adults | Melissa Ser Lee Ng |
| 16 | Differences in cognitive decline in amnesic mild cognitive impairment due to primary age-related tauopathy and Alzheimer's disease | Mika Konishi |
| 17 | Design of ADEPT-2, a phase 3, parallel group study to evaluate xanomeline and trospium as a treatment for psychosis associated with Alzheimer's disease dementia | Minsu Kang |
| 18 | Perceived cognitive failures, symptoms of bipolar disorder, and psychological well-being | Norm O'Rourke |
| 19 | Cultural adaptations of an evidence-based mental health intervention for older adults with depression and anxiety in a low-resource setting in Peru. | Oscar Flores-Flores |
| 20 | Comparative Analysis of Efficacy of Intravenous Ketamine and Intranasal Esketamine in Treatment-Resistant Depression across Age Groups | Patricio Riva Posse |
| 21 | Association of exercise with melatonin level in community-dwelling older adults | PinShiuan Lee |

| | | |
|----|--|-----------------------|
| 22 | Perceived sleep quality, the use of sleep medications and their association with cognitive performance in Brazilian older adults | Rafael G. Campos |
| 23 | Effects of cannabidiol on behavioral and psychological symptoms of vascular dementia: a randomized, double-blind, placebo-controlled trial | Rebeca Pessoa |
| 24 | Safety of Mirtazapine use in older people: A systematic review | Rebeca Pessoa |
| 25 | Suicide in Chilean elderly and deconfinement policies. | Roberto Carlos Sunkel |
| 26 | Exploring Attitudes towards Sexuality and Their Impact on Sexual Satisfaction among Older Adults in a Psychogeriatric Clinic in Mexico City | Rodrigo Gomez |
| 27 | Anti-dementia drugs and Repetitive Transcranial Magnetic Stimulation in neurocognitive disorders | Rose Emily Nina |
| 28 | Effects of Cognitive Stimulation Combined with Transcranial Direct Current Stimulation on Cognitive Performance and Cortical Excitability in Amnesic Mild Cognitive Impairment | Ruth Alcalá-Lozano |
| 29 | Neuropsychological and brain profiles in elderly adult cancer survivors: A population-based cross-sectional study | Ryo Shikimoto |
| 30 | Poststroke psychosis following pontine lesions in geriatric patients: a case series | Sarah C. Touponse |
| 31 | Electroconvulsive therapy for treatment-resistant depression in a patient with hereditary paraganglioma/pheochromocytoma syndrome | Sarah C. Touponse |
| 32 | Sleep Monitoring-Assisted Discontinuation of Sleeping Pills in an Older Patient with insomnia: A Case Report | Sayaka Hayashi |
| 33 | Advancing-Age-Related Issues Queried through an Exploratory Survey | Sheri Doyle |
| 34 | Impact of developing cognitive decline on life satisfaction in Japanese older adults: the Arakawa Geriatric Cohort Study | Shogyoku Bun |
| 35 | Building Resilience in Geriatric Health Today (BRIGHT) | Lucas Ting Sing Qin |
| 36 | The Effect of Home-Visit Nursing in Preventing Readmission of Patients with Mental Disorders to Psychiatric Hospitals: A Literature Review | Taiki Teshima |
| 37 | Memantine effects on resting-state EEG sources in Alzheimer's disease | Takahiro Mori |
| 38 | Effectiveness of Brief Interventions for Reducing Alcohol Consumption in Older Adults: a Systematic Review and Meta-Analysis | Tassiane Paula |
| 39 | Late-life drinking in primary care users in Brazil: a cross-sectional study | Tassiane Paula |
| 40 | The pattern of social cognition impairment in young-onset and late-onset Alzheimer's disease | Tatiana Belfort |
| 41 | Buddhist temples are promising social resources in secular community-based integrated care (1): Interviews with Buddhist priests who work as health care professionals. | Tsuyoshi Okamura |
| 42 | Multimorbidity Patterns and their association with depressive symptoms among elderly: A Latent Class Analysis of the Brazilian Longitudinal Study of Aging (ELSI-Brazil) data | Vinícius Boaventura |
| 43 | Effect of sleep report feedback using information and communication technology combined with health guidance on subjective and objective sleep discrepancy among older people with and without uncoupled sleep | Wenping Mo |
| 44 | Expressed emotion mediate the association between relationship closeness and psychological symptoms dementia people | Xiaoji Liu |
| 45 | Fraud Victimization and Scam Vulnerability in the Arakawa Cohort Study Conducted in an Urban Area of Japan | Yoko Eguchi |
| 46 | Network Structure of Depressive Symptomatology in Elderly with Cognitive Impairment | JeeHyung Pyo |
| 47 | Measuring the Unspoken: Development of Two Instruments to Assess Nursing Home Caregivers' Implicit Associations with Behaviors to Improve Residents' Mood | Debby Gerritsen |
